

2021 Blue Cross Blue Shield of Michigan Cardiovascular Consortium Collaborative Quality Initiative Performance Index Scorecard <b>Vascular Surgery Only</b> Measurement Period: 01/01/2021 - 12/31/2021			
Measure #	Weight	Measure Description	Points
1	15	<b>Meeting Participation - Clinician Lead</b>	
		2 Meetings	15
		1 Meeting	10
		Did not participate	0
2	10	<b>Data Coordinator Expectations (Includes 1 year follow-up ≥80%)</b>	
		Meets all expectations (1 Year FU ≥80%)	10
		Meets most expectations (1 Year FU 60-79%)	5
		Does not meet expectations (1 Year FU <60%)	0
3	10	<b>NEW - Internal Case Reviews</b>	
		Submitted reviews for ≥90% of cases	10
		Submitted reviews for <90% of cases	0
4	10	<b>NEW - Physicians Complete Cross Site Review of Assigned Cases for Procedural Indications and Technical Quality</b>	
		Submitted reviews for 100% of cases	10
		Submitted reviews for <100% of cases	0
5	20	<b>Vascular Surgery Collaborative Goal - Statin at Discharge for Open Bypass, CEA* and CAS^ Discharges</b>	
		≥95%	20
		93% - <95%	15
		90% - <93%	10
		<90%	0
6	17.5	<b>Vascular Surgery Performance Goal – Surgeons to prescribe a maximum of 10 opioid pills for opioid naïve patients with EVAR† at discharge</b>	
		≥80%	17.5
		75% - <80%	15
		70% - <75%	10
		<70%	0
7	17.5	<b>Vascular Surgery Performance Goal – Surgeons to prescribe a maximum of 10 opioid pills for opioid naïve patients with CEA* at discharge</b>	
		≥80%	17.5
		75% - <80%	15
		70% - <75%	10
		<70%	0

100

6 sites participate in Vascular Surgery only

\*CAS=carotid artery stent

^CEA=carotid endarterectomy

†EVAR=endovascular aneurysm repair
