

2022 Blue Cross Blue Shield of Michigan Cardiovascular Consortium  
 Collaborative Quality Initiative Performance Index Scorecard **PCI & VS Combined**  
 Measurement Period: 01/01/2022 - 9/30/2022

Measure #	Weight	Measure Description	PCI Points	VS Points
1	10	<b>Meeting Participation - Clinician Lead</b>		
		2 Meetings	5	5
		1 Meeting	2.5	2.5
		Did not participate	0	0
2	5	<b>Data Coordinator Expectations</b>		
		Meets all expectations	2.5	2.5
		Meets most expectations	1	1
		Does not meet expectations	0	0
3	2.5	<b>Internal Case Reviews</b>		
		Submitted reviews for ≥90% of cases	2.5	NA
		Submitted reviews for <90% of cases	0	NA
4	2.5	<b>Physicians Complete Cross Site Review of Assigned Cases for Procedural Indications and Technical Quality</b>		
		Submitted reviews for 100% of cases	2.5	NA
		Submitted reviews for <100% of cases	0	NA
5	10	<b>Vascular Surgery Performance Goal - Documentation of EVAR† imaging performed on the 1-year follow up form</b>		
		≥70%	NA	10
		60% - <70%	NA	5
		<60%	NA	0
6	10	<b>Vascular Surgery Performance Goal - Completion of 1-year follow up forms</b>		
		≥90%	NA	10
		85% - <90%	NA	5
		<85%	NA	0
7	10	<b>Vascular Surgery Performance Goal – Surgeons to prescribe a maximum of 4 opioid pills for opioid naïve patients with EVAR† at discharge</b>		
		≥70%	NA	10
		60% - <70%	NA	7.5
		<60%	NA	0
8	10	<b>Vascular Surgery Performance Goal – Surgeons to prescribe a maximum of 4 opioid pills for opioid naïve patients with CEA* at discharge</b>		
		≥70%	NA	10
		60% - <70%	NA	7.5
		<60%	NA	0
9	10	<b>PCI Performance Goal - Documentation of recommended P2Y12 therapy duration</b>		
		≥70%	10	NA
		60% - <70%	7.5	NA
		<60%	0	NA
10	10	<b>PCI Performance Goal - Percent of cases with Air Kerma dose ≥5 Gray</b>		
		≤1%, or ≥50% reduction from Q4 YTD 2021 Air Kerma ≥5 Gray	10	NA
		>1% - 2% or ≥40% reduction from Q4 YTD 2021 Air Kerma ≥5 Gray	7.5	NA
		>2% - 3% or ≥30% reduction from 2021 Air Kerma ≥5 Gray	5	NA
11	10	<b>PCI Performance Goal - Pre PCI hydration (oral and/or IV) (volume/3ML/Kg) in patients with eGFR** &lt; 60 (excludes dialysis, cardiac arrest, cardiogenic shock, PCI status of "salvage" and symptomatic heart failure NYHA^^ 2,3,4, and STEMI††).</b>		
		≥50%	10	NA
		40% - <50%	5	NA
		<40%	0	NA
12	10	<b>PCI Performance Goal - Major bleeding (within 72 hours of PCI, excludes patients with concurrent interventions)</b>		
		≤0.85%	10	NA
		>0.85% - 1%	5	NA
		>1%	0	NA

100

\*\*eGFR=estimated glomerular filtration rate

^^NYHA= New York Heart Association heart failure class

††STEMI=ST elevated myocardial infarction

†EVAR=endovascular aortic aneurysm repair

\*CEA=carotid endarterectomy

Indicates Participation Measures
