

Pre procedure smoking cessation

Pre procedure smoking cessation has been removed from Indications and is located on the discharge form. This field will display when Yes is entered for Current Smoker.

Labs

Hba1c, HDL, and LDL have been removed from the discharge form and are in the Labs section.

Vessel Location

The vessel locations drop-down lists will contain only the arteries that we collect data. For example, the carotid arteries, pulmonary arteries, and thoracic aorta have been removed from these lists.

Medications

Medications prior to arrival, Medications at discharge, and medications on the follow-up forms will be listed in alphabetical order. Calcium Channel Blockers and Thiazides are added to the follow-up forms.

Pre-procedure exercise therapy

Pre-procedure exercise therapy has been removed from Indications and is located on the procedure form above the Hybrid Procedure field.

Heparin Administered Y/N

This field has been removed from the procedures form.

Total Heparin Dosage

Total Heparin dosage currently displays when Yes is entered for Heparin Administered. This field will no longer be a conditional field. This field will have the same functionality as Total IV contrast Used.

Total Heparin Dosage

- Yes
 - Enter value for Total Heparin Dosage (units)
- Not documented
