

Case Lists

The BMC2 Coordinating Center will post the case list to bmc2.org under the reports section on or prior to 7/4/2023. This list will contain the BMC2 discharge ID#s, NCDR PT ID, NCDR Other ID, Discharge date and procedure date. Coordinators will be required to upload the redacted documentation for **3 cases**. **The BMC2 PCI Case File Upload Deadline is 8/4/2023.** Sites will use the same case list for the External Peer Review and the Internal Peer Review.

To retrieve your case list:

- Sign into bmc2.org/member login using Chrome, Firefox, or Microsoft Edge. Do not use Internet
 Explorer. You will not be able to access your case list if you sign into the website using Internet Explorer.
- Click on the **Downloads** link under the **Main Menu** on the left side of the screen.
- Click on reports.
- Click on the **peer_review** link.
- Click on the **2023B** folder.
- Download and review the list of cases.

If a coordinator cannot retrieve the required documentation for the assigned cases, they must contact the Coordinating Center to request a "replacement" case assignment. If you have questions or need assistance, please contact Kathleen at the Coordinating Center (734) 752-0927.

Required Documentation

Each assigned case should include the documentation listed below. Combine the documents into **one PDF file.** Name each file using this method: [**NCDR_ PTID_#].pdf.** For example, if the NCDR PT ID# is 1234567. You will name the file NCDR_PTID_1234567.

- History and Physical (H&P)
- Physician dictation of the procedure
- Stress test result summary leading to this procedure
 - \circ do not include if not part of the indication for this procedure
 - \circ do not include the ECG pages
- Anonymized coronary angiogram for the requested procedure (Name file with NCDR PT ID)
 - Upload this file to dicom.bmc2.org in the "DICOM 1" section.
- Anonymized IVUS/OCT images if applicable
 - o If not performed during this procedure, you will not need to upload any additional file
 - If performed but included in the same file as the coronary angiogram, upload as is, no need to separate files.
 - Upload this file to dicom.bmc2.org in the "Supplemental Images" section.
- In addition to the required documentation, coordinators may choose to upload supplemental documents that are pertinent to the current episode of care and/or the procedural indication.

*The information uploaded should be as concise as possible and should include date of service.

File Redaction

The process for obtaining and redacting files will vary by site, depending on the protocols and procedures in place. If you are not familiar with your site's protocols, BMC2 recommends contacting your Health Information Management (HIM) or Medical Records department for assistance. If you have questions regarding the redaction of a piece of information, contact the <u>Coordinating Center</u> for clarification. Please read the redaction guidelines carefully. Failure to follow these guidelines could result in a deduction of P4P points.

Information to redact:

- PHI: Patient Name, MRN, SSN, address, full-face photograph, etc.
- Geographic areas smaller than a state (city, township, street name, etc.)
- Encounter number, FIN number, insurance plan
- References to the hospital or location of the procedure (hospital name, address, zip code, site logo)
- Operator information or referring physician
- All employee names
- All phone numbers and fax numbers
- Any information that could allow a reviewer to identify the patient, the physician, the hospital, or region

Do not redact the patient's DOB unless the patient is over 89 years old. **Do not** redact the date of service listed on the document.

Methods for redacting information

Adobe Acrobat Pro comes with an easy-to-use redaction feature for redacting information in PDFs. We find this is the **best method** of ensuring that the reviewer cannot see the redacted information.

We suggest you also remove metadata. See below for instructions related to the removal of metadata in Adobe Pro:

- Run Adobe Acrobat as an Administrator. To do this, simply right-click on the Acrobat Pro icon and select "Run as administrator."
- When the program loads, go to "File" and select "Properties."
- A window will appear. From here, select "Additional Metadata..."
- This will display the PDF's metadata. You will have the option to edit the data or remove it altogether.
- Choose to remove it, and then click "OK."
- After making the appropriate changes, it's important to remember to save your PDF.
- So go back to "File" and select "Save." You may also press "Ctrl + s" on your keyboard to achieve the same action.

Using Adobe Acrobat Pro for Redaction:

- Sign in to your EMR
- Epic users go to page 6 for instructions on how to remotely redact a pdf.
 - This method may or may not be available for you based on the EPIC structure at your facility.
- Cerner users go to page 9 for instructions on how to remotely redact a pdf.

Manual Redaction:

- Whiteout tape/rollers (Next best method if Adobe Acrobat Pro is not accessible).
- Black marker (Sharpie, Magnum, Flipchart, etc.) You must copy the documents after redacting the information with a black marker before scanning the documents so that information will not show through the marker. The coordinating center will return the documents to the coordinator for correction, and P4P points may be deducted if the information shows through the black marker.
- The HIM/Med Records Departments at some sites will gather and redact the required information; however, the coordinator is responsible for communicating to the HIM/Med Records Department the information to redact.
 - Coordinators are responsible for verifying that all necessary fields have been removed.
 - Coordinators are still required to upload documents following the guidelines given by BMC2.
 - Please have a co-worker double-check your redaction before uploading your file.

Uploading Case Files

- After you have gathered and redacted the necessary case documentation, converted the documents to a pdf, and obtained anonymized images from the cath lab, the next step is to upload the files to the <u>BMC2 Peer</u> <u>Review Uploader</u> website. Uploading all documentation to the BMC2 Peer Review Uploader website is required. Notify the BMC2 Coordinating center via email when all files are uploaded.
- Send your email to the coordinating center contacts.
- Kathleen Frazier (frazieka@med.umich.edu) and Amy Shirato (shirato@med.umich.edu)
- The coordinating center staff will review the documents and images for: completeness, redaction, and correlation.
- Coordinators will be notified via email when their cases have been reviewed and the next steps they should take.

Uploading Case Files to the BMC2 Peer Review Uploader Website

<mark>1.</mark>	Go to the <u>BMC2 Peer Review Uploader</u> website using Chrome, Firefox, or	BMC2	<u>Contact us</u>
